PROFESSIONAL SUMMARY

Results-driven Junior Data Analyst and B.Tech AI & Data Science graduate (Anna University, June 2026, CGPA: 7.66/10) with 7 months of hands-on internship experience delivering end-to-end analytics solutions using SQL, Power BI, Python, and Excel. Identified a 15% revenue decline and automated financial KPI dashboards across GitHub projects. Proficient in EDA, data cleaning, star schema modelling, DAX, ETL pipelines, and MIS/KPI reporting. Available within 30 days.

TECHNICAL SKILLS

SQL	MS SQL Server · Window Functions (RANK, ROW_NUMBER, LAG, LEAD) · Multi-table JOINs · Subqueries · GROUP BY / HAVING · Aggregations
Power BI	KPI Dashboards · DAX Measures & Calculated Columns · Data Modelling (Star Schema) · Drill-Through · Slicers · Power Query (ETL) · Report Automation
Python	Pandas · NumPy · Matplotlib · Seaborn · Data Cleaning · Data Visualization · EDA · ETL Pipelines · Outlier Detection · Jupyter Notebook · Google Colab
Excel	VLOOKUP · XLOOKUP · INDEX-MATCH · SUMIF · COUNTIF · Pivot Tables · Conditional Formatting · MIS & KPI Reporting

WORK EXPERIENCE

Data Analytics Intern | SkillFied Mentor Pvt. Ltd. (ISO 9001:2015 | Remote) *Jul 2025 · 1 Month*

- Performed EDA on business datasets using Python (Pandas, NumPy, Matplotlib, Seaborn); automated ETL data-cleaning pipeline covering null handling, outlier detection, and duplicate removal.
- Built Power BI KPI dashboards with DAX measures, drill-through filters, and slicers; delivered actionable BI reports to stakeholders.

Data Analytics Intern | UK Infotech, Pudukkottai (ISO 9001:2015 Certified) *Aug 2025 – Mar 2026 · 6 Months*

- Analyzed Netflix Dataset end-to-end: collected and cleaned raw data, performed EDA to identify trends by genre, country, and release year, and visualized insights using Python (Pandas, Matplotlib) and Power BI; delivered data-driven content strategy recommendations.
- Built 3 independent analytics projects featuring star schema models, DAX calculated columns, churn analysis, revenue analysis, and automated stakeholder reports. Achieved Grade A (82%).

ANALYTICS PROJECTS

SaaS Churn & Revenue Analysis | SQL Server · Power BI · Python · Excel ↗ GitHub

- Queried 10,000+ records using SQL Window Functions (RANK, LAG, ROW_NUMBER) with multi-table JOINs; computed churn rate, ARPU, and CLV; identified top 3 high-churn segments with targeted retention strategy.
- Built Power BI star schema dashboard with DAX and drill-through slicers; prepared and cleaned data via Python Pandas ETL.

E-Commerce Customer Segmentation | SQL · Python · Power BI ↗ GitHub

- Segmented 10,000+ e-commerce customers using SQL aggregations and Python EDA (Pandas, Seaborn); Power BI dashboard delivered actionable segment insights supporting targeted marketing and retention strategies.

Financial Performance Dashboard | Power BI · Python · Excel ↗ GitHub

- Removed 300+ erroneous entries via Python Pandas ETL; built Power BI star schema with DAX for YoY growth and budget variance — uncovered 3 cost-saving opportunities; MIS reporting via Excel INDEX-MATCH and Pivot Tables.
